

The MAXAIR® Systems DLC (Disposable Lens Cuff) consists of an integrated Lens and Cuff. It is the standard and basic face cover used in MAXAIR Systems PAPR configurations.

All versions of the DLC are NIOSH approved and provide respiratory protection against airborne particulate contaminants when properly configured and donned with a MAXAIR CAPR® Powered Air Purifying Respirator (PAPR) System.

Indications for use of the DLC

Situations requiring a NIOSH approved powered air purifying respirator:

- Situations where there is exposure to airborne particulate contaminants.
- Where OSHA Assigned Protection Factor, APF of 25 is desired.

Contraindications for use of the DLC

- Non-IDLH atmospheres where the oxygen content is between 19.5% and 25%.
- Where a protection factor, APF, greater than 25 is desired.
- Where extra fluid resistance protection against liquid splash is indicated.

Types and Sizes of DLC

2365-02ML is for all Non Hard Hat configurations. The ML fits most head sizes from medium to large.

2365-02SM is for all Non Hard Hat configurations. The SM fits smaller head sizes.

2366-02ML is for all Hard Hat configurations. The ML fits most head sizes from medium to large.

2366-02SM is for all Hard Hat configurations. The SM fits smaller head sizes.

Types of DLC Packaging

DLCs are packaged 40 in a polybag, and one polybag of 40 in a dispensing box.

The ML box is longer than the SM box so that they are easily identified and can be stacked appropriately, a SM Box on top of an ML box.

The DLCs are packaged in two types of boxes.

- Standard Cardboard Box
- Re-useable Plastic Box
