PRS Hood Data Sheet

Product Overview

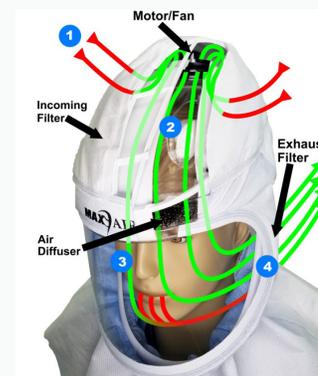

The PRS Hood is a sterile hood designed to attach directly to the PR Helmet as part of the CAPR® Surgical Protection System. It provides full barrier coverage around the face, head, and torso while supporting respiratory, splash, and contact protection.

Product Information

REF Number(s)	2281PRS-100
Market Application	Surgery
Product Classification	Hood
Regulatory	FDA ¹ , NIOSH ²
Packaging	Sterile
Quantity per Package	20
Size Specifications	One-Size
System Compatibility	2084-04 PR Helmet
System Capability	PAPR100-N, APF 1000, Source Control ³ , Level 4 Fluid Barrier ⁴

How it Works

The PRS Hood pulls air through its top filter, delivers a continuous flow of clean air to the wearer, and filters exhaled breath through the cuff for added source control.
