

MAXAIR®

Beyond the Surgical Helmet

The MAXAIR® CAPR® Surgical Protection System (SPS) redefines surgical protection

- ✓ Advancing *patient* and *staff* health outcomes
- ✓ Increasing *comfort* and *performance* compared to traditional surgical helmet systems (SHS)

COMFORT

SAFETY

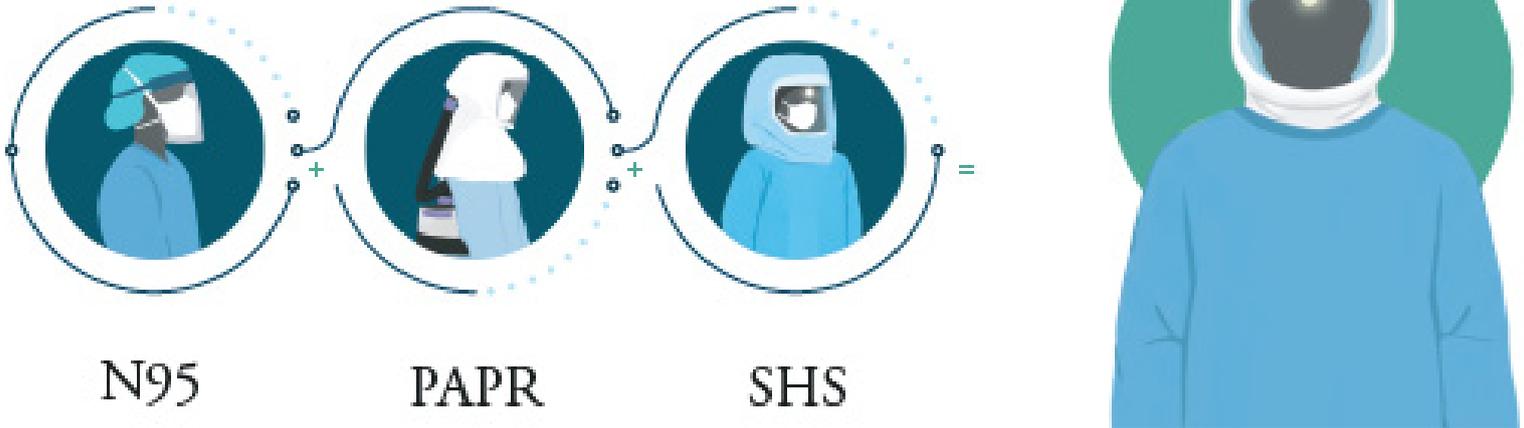

Surpassing Traditional Surgical Helmet Systems
where it matters most

THE 3-in-1 ADVANTAGE

NOT JUST ANOTHER SHS

The MAXAIR® CAPR® SPS integrates the capabilities of *three systems into one.*

CAPR® SPS tackles the key challenges surgical teams face by combining the strengths of N95s, PAPRs, and traditional helmet systems into one advanced solution.

Current SHS Challenges

&

MAXAIR® SPS Solutions

Uncomfortable, bulky surgical helmet systems (SHS) that cause fatigue and heat buildup.

Lightweight, balanced helmet with adjustable airflow speeds and a breathable hood back.

Lens fogging and restricted visibility during long procedures.

Wide field of view with unrestricted head movement and a fog-free, glare-free lens.

Poor fit or inconsistent protection across the surgical team.

Universal fit, one system fits every surgical team member.

Compliance fatigue and time lost to fit testing.

All-in-one system that removes the need for fit testing, N95s, or surgical masks.
